Question of the week: Who wrote the bible and when was it written? The Bible was written over a period of 1400 to 1800 years by more than 40 different authors. The Bible is compiled of 73 separate books, divided into two primary divisions: the Old Testament and the New Testament. The books of the Bible in their entirety, with all of their parts, are sacred because they were written under the inspiration of the Holy Spirit, and have God as their author. In composing the sacred books, God choose men, and while employed by him they made use of their powers and abilities, so that with Him acting in them and through him, they as true authors, consigned to writing everything and only those things which he wanted.
