

# Return to Nature with Kangen Water®

Greener Living is Possible... Greener Living is Kangen Water®!

At Enagic®, we translate the Japanese word "Kangen" to mean "a return to origin." And that is exactly what this healthy water can do in your home. With the 5 types of Enagic® water, you can unearth greener solutions in your entire household to bring you closer to the life Nature intended.

## Greener Living

No one wants a home full of chemicals and pesticides, and most Americans are generally aware that these toxins can be harmful to our families and our environment. The US Environmental Protection Agency has reported that hazardous household chemicals can pollute municipal tap water and natural water sources such as rivers, streams, and oceans. Beach closings and even endangered wildlife have been linked to "seemingly negligible amounts" of household chemicals. (1)

Obviously, the chemicals and toxins have to go! But how can you rid your home of cleaning products, laundry detergent, soaps, shampoos, fragrances, etc? You need these products to keep your house and your body clean, right?

*"The earth is what we all have in common"*

*- Wendell Berry  
Author, farmer, cultural critic.*

## Maximize the Machine

This is where the Enagic® water ionizing machine can help you establish a cleaner and greener home! The range of alkaline and acidic waters generated by the Enagic® machines can be used to create green solutions to your

everyday household needs.

## Kangen Water® and Beyond

You may already know that Kangen Water® is a healthy choice for clean and pure hydration with alkaline water. But the Enagic® water ionizing machines can do even more. There are no limits to the uses of the 5 types of Enagic® water, and we invite you to learn more about how this one innovative product can transform your home from the inside out.

Find out how you can say "Farewell" to the chemicals that are polluting your home, thanks to the 5 types of Enagic® water.

# What does it mean to have a "Greener" Lifestyle?

Living a "green" lifestyle has become a trendy topic the last few years. There's a good reason for that! Going green means making earth-friendly decisions and consuming products that are ethically-produced, recyclable, and energy-efficient. In other words, make healthy choices for your body, your home, and your Earth.

Thankfully, you can master a green lifestyle with the help of Enagic®!

## HazMat in the Home

The first step towards embracing a greener lifestyle is to take inventory of what is already in your home. What are you and your family members allowing to enter your body every day, whether by contact with your skin or inhalation?

If you are like any other average American household, what you find will probably shock you. The United States Environmental Protection Agency reports that a typical US house contains 100 pounds of hazardous household products<sup>(1)</sup> at any given time.

In fact, the unfortunate truth is that household chemicals are so prevalent that they are actually causing indoor air pollution 2-5 times greater than outdoor air pollution!<sup>(2)</sup> According to recent research by *Environmental Science and Technology*, a total of 586 chemicals were identified in the American homes included in this 2009 study, and 120 chemicals remained unidentifiable by scientists. The most troubling result of this study was the common presence of chemicals that have been banned by the US, such as DDT.

Even with all these findings, there have been very few studies that document the health effects of indoor air pollution<sup>(3)</sup>. Although the US General Accounting Office

has labeled indoor air pollution by hazardous chemicals "one of the most serious environmental risks to human health," there is too little research and too little oversight.

Thankfully, YOU get to decide what chemicals enter your home. YOU can make the choice to create a clean, green home with natural products that will not harm your body or your Earth.

So get rid of the cleaners, detergents, beauty care products, pet products, etc. that are polluting your house, and let a multi-purpose Enagic® water ionizing machine do the work - Naturally!

Better for YOU  
Better for the Earth!

# A Greener Home

**Y**ou need household products that are harsh on dirt and stains, but gentle on the Earth and your family's health. With an Enagic® machine, you can have the best of both worlds!

## The Strong Waters

The state-of-the-art Enagic® machines incorporate the process of electrolysis to generate alkaline and acidic waters of varying strengths. Strong Kangen Water® (pH 11.0) and Strong Acidic Water (pH 2.7) are not for drinking, but they have unique characteristics that make them very useful and versatile around your home.

## Strong Kangen Water®

Strong Kangen Water® is a no-nonsense tool against dirt and grime in your home. This water can wash dishes, remove stains (even oil and coffee), get rid of roughness from vegetables, eradicate toilet bowl stains, etc.

With just a few other ingredients that you can already find in your home, you can make an all-natural All-Purpose Strong Kangen Water® Cleaner, Strong Kangen Water® Window Cleaner, Strong Kangen Water® Dish Soap, and more. Stop depending on chemical-filled cleaners that are mass-produced and sold with a high mark-up price. Now you can save money and support a greener home with Strong Kangen Water®.

## Strong Acidic Water

Strong Acidic Water also has excellent cleaning characteristics, but it cleans in a different way. It can sanitize your home and help eliminate germs and bacteria. It can be used to clean household surfaces and remove pesticides, dirt, and other impurities from foods. Clean everything from toothbrushes to knives, cutting boards, toilet seats, your kitchen sink, and more!

## It's Basic Chemistry: Chemical-Free Cleaning and Sanitation!

You can scrub almost any crevice of your home with one of these 2 Strong Waters, and you're sure to get sparkling, green results!

If you are seeking a greener alternative to the harsh cleaning products you've relied on for years, Enagic® has great news for you. You can still get the results you want at the value your pocketbook demands. No more trips to the grocery store to buy different cleaning products for each room in the house. With an Enagic® water ionizer, you will have virtually unlimited access to all the chemical-free cleaning products your house needs!

*Get Greener and Get Smarter  
with Enagic®!*

## Greener Laundering

If you have never looked at the label of your favorite laundry detergent, now is the time! But be prepared to feel utterly foolish trying to pronounce the names of all the ingredients you will find. The truth is, your laundry detergent may be the most poisonous product in your home! <sup>(1)</sup>

Here is what you can expect to find in most store bought laundry detergents:

- Water
- Phosphates
- Nonylphenol polyethoxylate (a surfactant that breaks down into an estrogen mimic) <sup>(2)</sup>
- Chlorine Bleach
- Lye
- Ammonia
- Phenols
- Fillers
- Other toxic chemicals

Unfortunately, the list goes on. As many as 26 synthetic fragrant chemicals can legally be included in your detergent without having a presence on the label. <sup>(3)</sup> These fragrance chemicals have been known to irritate skin, among other complications. In other words, when you investigate which detergent you should buy for your family at the local supermarket, you may be kept in the dark about ingredients in those products that can ultimately affect your health. It is becoming ever difficult to be an educated consumer, as the manufacturing companies are concealing information that would undoubtedly affect your purchasing decision.

The US Environmental Protection Agency has grouped all the ingredients of common laundry detergents into 9 sweeping categories, and listed the harmful characteristics of each <sup>(4)</sup>. These characteristics include toxicity to humans in general, toxicity that "may cause cancer or other adverse health effects in humans," toxicity that may lead to "developmental and reproductive effects," ingredients that may cause "severe irritation or burns to living tissue," toxicity to aquatic wildlife (after the chemicals have washed down the drain and polluted natural water sources), and metalized colorants that present environmental concerns.

Do not despair! You have another option that is good for the Earth and for your body.

### **Kangen Water®: Gentle on Fabrics, the Eco-System, and the Body**

Kangen Water® can do so much more than provide optimal hydration for your body! This special alkaline water also plays an essential role in green laundering. When combined with other common all-natural household ingredients (such as baking soda, essential oils, cooking oils, etc), Kangen Water® can be used to make your own laundry detergent and liquid castile soap.

No more chemicals! No more skin irritations! No more polluted run-off into natural water sources!

Making your own laundry detergent is easy, fun, and the responsible decision for your health and environment. And you will love the results! Kangen Water® Laundry Detergent washes your clothes gently, leaving them clean without jeopardizing color brilliance.

And since you can select an Enagic® machine that's just the right size for your family, you will never have to worry about this high performance water generator running out of steam. You can have access to all the Kangen Water® you need to stay on top of your hydration AND greener laundering!

Have peace of mind that the clothes your family wears do not contain chemicals that may be absorbed by your skin. Go green with Kangen Water® laundering!

## Cleaner, Greener Kitchen with Enagic®

One room in your home that cannot be overlooked in your Green Home Takeover is the kitchen. The kitchen is a safe haven for germs, and even boasts more bacteria than your bathroom. With so many microscopic pathogens calling your kitchen home, you need a hefty cleaner (or two) and a clear-cut plan. But don't make the mistake of reaching for all-purpose cleaners in the supermarket, as these products will contain more of the chemicals that you are working so hard to eliminate.

The Strong Enagic® Waters are excellent choices for greener tough cleaners. With an Enagic® water ionizer, you can make an All-Purpose Strong Kangen Water® Cleaner to remove dirt, pesticides, grease, grime, messy spills, etc in your kitchen. Then switch to Strong Acidic Water for the areas that need sanitized, such as countertops, cutting boards, and knives.

### Scrubbing the Dishes Green

Strong Kangen Water® is very versatile in the kitchen, as it also provides a great solution for dish soap. You can save on water and soap by using Strong Kangen Water® by itself to wash your dishes. It only takes a quarter of the usual amount of water to rinse off, and it is immensely effective. With its extra strength and high absorption qualities, you will have sparkling clean dishes every time.

If you prefer to use bubbly dish soap, you can make your own with Strong Kangen Water®! All you need is a little motivation and a few other common household ingredients, and you can have an all-natural and innovative alternative.

### Here is your plan for a cleaner kitchen:

#### 1. Clean Your Sponges

Wash your sponges regularly in the dishwasher with Homemade Dishwater Detergent, and microwave them for two minutes while still damp. This can help remove germs that easily spread from your sponge.

#### 2. Wash Your Kitchen Towels with Kangen™ Laundry Detergent

Just like your moist sponge is a breeding ground for germs, your damp dishrags may be dirty culprits in spreading microscopic germs around your kitchen and hands. Make sure to wash your kitchen towels in Kangen™ Laundry Detergent.

#### 3. Keep It Clean

Keep two spray bottles of the Strong Water Cleaners close by, and keep germs at bay!

#### 4. Wash Your Hands

Before and after handling food, be sure to wash your hands. You can even make your own hand soap or hand sanitizer with Strong Acidic Water.

## Healthy Cooking

It is simply not enough to hydrate with Kangen Water® every day for a healthy body. With so many different uses of the Enagic® machine, you can go far beyond optimal hydration!

You can learn to integrate different Enagic® waters into your daily cooking regime, thereby maximizing the versatility of the Enagic® machine as you prepare your favorite meals.

### Prep Work with Enagic®

Start your food preparation with healthy clean ingredients: the Enagic® Waters.

Combine the powers of Strong Acidic Water, Kangen Water®, and Strong Kangen Water® to clean your food, and have peace of mind that your fresh ingredients are purged of any unwanted impurities.

1. First soak produce, eggs, fish, and even meat in Strong Acidic Water to remove bacteria from your food.
2. Then soak the food in Strong Kangen Water to remove pesticides.
3. Finally, rinse well with Kangen Water® before eating or cooking.

Why use ordinary tap water (which may contain contaminants or pollutants) to clean your food? If you want to ensure that your food has been stripped of substances you don't want in your body, you need the Enagic® waters!

### Kangen® Cooking

With its delicious mild taste and healthy alkalinity, Kangen Water® makes the perfect substitute for regular water in almost any recipe - and it will draw out the natural flavors and aromas of your fresh ingredients! Why cook with acidic tap water when you can use clean, ionized and alkalinized Kangen Water®?

Here are some easy suggestions for cooking with Kangen Water®:

1. Use Kangen Water® to make homemade broths. Kangen Water® will draw out all the delicious flavors of vegetable, seafood, beef, or chicken broth.
2. Brew your favorite Fair Trade coffees or teas with Kangen Water® (but remember to still drink 8-10 glasses of Kangen Water® every day!).
3. Steam your food with Kangen Water®. Steaming food is one of the healthiest cooking methods, as it allows fresh nutrients to be retained more than boiling, frying, baking, or microwaving. Kangen Water® brings out the delicate flavors of steamed food, especially if you're using a bamboo steamer!
4. Use Kangen Water® when making soups or cooking with pastas, beans, couscous, oatmeal, etc.

Explore gourmet Kangen Water® cooking with a new Enagic® ionizing machine today!

**Prepare food with passion and purpose.**

## Ravishingly Green... with Enagic® Beauty Water

**T**ransforming your home into a greener living household will ultimately include a beauty care face-lift. When was the last time you looked at the ingredients of your beauty products? After reading the labels, you will probably wonder how your skin survived so many years of chemical therapy! Why are so many chemicals in products that are supposed to be making your skin supple, healthier, and more glowing?

### *The Truth About Beauty Products*

The Environmental Working Group (EWG) has reported that the United States Food and Drug Administration has not evaluated almost 90% of all skin care and beauty products on the US market. Meanwhile, most skin care products contain petrochemicals, synthetic fragrances, parabens (chemical preservatives), and chemical fillers. <sup>(1)</sup>

This is very disconcerting because your skin is your largest organ, and there is great potential for you to absorb more toxins through the skin than anywhere else. Furthermore, your skin requires the same types of nutrients as the rest of your body. So why would you choose a skin care or beauty care product that is riddled with chemicals and synthetic materials?

If you are interested in any organic products, you should surely be passionate about organic personal care products that are applied directly to the largest organ of your body.

But that is not the end of this sad story. The chemicals don't dissolve completely on your skin. These synthetic chemicals are washed down the drain and eventually find their way to our natural water sources. Such pollution is harmful to our environment and eco-system.

### **Be Good to Your Body, Your Budget, and Your Environment!**

There is no debate that natural beauty products are important for you and the Earth. Natural IS better! But how much are you willing to pay for eco-friendly products that will give you the results you need? Most organic and all-natural personal care items are very expensive, and do not always give you the quality you desire.

Thankfully, you can have another alternative. You DON'T have to settle for chemical-filled personal care products. And you DON'T have to pay top dollar for all-natural beauty products that may not work.

With an Enagic® water ionizing generator, you can produce the main ingredient you need to make homemade all-natural personal care products: Enagic® Beauty Water!

### *Beautifully Green*

Beauty Water is a remarkable, gentle astringent that can help support the proper pH level of your skin, which is slightly acidic. Why use chlorinated tap water when you could have glowing Beauty skin? With just the push of a button, the Enagic® water ionizing machines produce enough Beauty Water to wash, rinse, and tone your whole body from hair to toes.

### **Be radiant...be natural...be green!**

### *Beauty Water Concoctions*

Not only can Beauty Water be used to wash and rinse your skin, but you can also use it to make Earth-friendly skin care products! Whether you're looking for all-natural shampoo, conditioner, soap, lotions, hand sanitizer, or perfume, the powerful Enagic® machines will generate the water you need to keep your skin and your environment clean, green, and radiant.

Transform your skin, hair, and beauty care products with Beauty Water today!

# Enagic® Hair Care

**Y**ou want your hair to be hydrated, shiny, healthy, and radiant. You want a shampoo and conditioner that will enliven your hair from root to tip. But what if your favorite hair care products are full of toxins and chemicals that may be harmful to your body? Research is still being conducted to determine how many chemicals are absorbed by your scalp, but in the meantime you can choose to only use shampoos and conditioners with natural ingredients.

## What Could Go Wrong?

Eyebrows were raised when the Campaign for Safe Cosmetics found in March 2009 that popular hair care products (including baby shampoo) contained formaldehyde and 1,4-dioxane, both which have been found labeled as probable human carcinogen by the EPA.<sup>(1)</sup>

The chemicals and additives in shampoos and soaps don't just affect you; they are also harmful to the environment. The Canadian federal government has labeled two of these silicon-based chemicals (called D4 and D5) as toxic. These two toxins, found prevalently in shampoos, soaps, paints, and plastics, not only pose a risk to human health, but also affect wildlife when they are seeped into the environment in large quantities.<sup>(2)</sup> Unfortunately, while the Canadian government harshly regulates these dangerous chemicals, the US government has yet to label them as toxic, or regulate them in any way.

## The Organic Dilemma

Many educated consumers choose to buy expensive organic products. If your budget can support this decision, than it is surely a step up from chemical-laden hair care products. The reality is most Americans do not have room in their budget for such an investment. What's more,

"organic" products are sometimes not worthy of all the hype. In order to meet federal requirements, producers who wish to sell products made with organic ingredients must only ensure that 70% of it is indeed "made with" organic elements.<sup>(3)</sup> The remaining 30% may be everything you are trying to dispel from your home!

## Enagic® has good news for you!

You do not have to resort to chemical-filled shampoos and conditioners. You can claim beautiful, hydrated hair with Enagic® Beauty Water today.

Beauty Water is healthy for your skin and scalp, and can be used to make a chemical-free, all-natural shampoo out of common ingredients already found in your home. Wash and rinse your hair everyday without worrying about the chemical effects on your skin, hair, and the environment.

You can also make your own natural Beauty Water Conditioner. With just three ingredients (Beauty Water, egg yolks, and almond oil), you will be amazed at how clean, moisturized, and beautiful your hair will feel after the first conditioning.

## Enjoy radiant hair with all-natural Beauty Water!

## *A Greener Globe, a Greener Garden...*

Gardening is an eco-friendly activity, and it is also ideal for everyone's health and budget. Gardening is a timeless hobby that provides a vehicle for connecting with Nature, burning calories with light exercise, and enjoying the healthy fruits of your labor.

But the decision to garden actually affects more than just your household. When you grow your own produce, herbs, and flowers, you reduce the needless waste of resources associated with transporting these goods across the globe.

### *...with Kangen Water®*

Gardening by itself is great, but gardening with Kangen Water® is even better! Just like your own body needs Kangen Water® for ultimate hydration, your plants need this remarkable water for nourishment, hydration, and revitalization. Enagic® water stimulates germination and improves seedling development, leaving your plants in peak condition without the use of harmful chemicals.

And since plants thrive in different soil pH levels, and some soils are already more prone to be alkaline or acidic, the Enagic® machine can produce a water with the exact pH level that your plants need to thrive.

You should first test your soil to see where it falls on the pH scale, and then determine the optimal pH level for each of your plants. Ideally, your plants will all require the same pH. Now you can determine if you should water your garden with Neutral Water, slightly alkaline Kangen Water®, or slightly acidic Beauty Water.

You will notice an astounding difference in your garden after nurturing them with the correct Enagic® water!

### Here are some other tips for maintaining an environmentally responsible garden: <sup>(1,2)</sup>

1. Select plants that use the least amount of water, fertilizers, and pesticides.
2. Preserve existing trees and shrubs.
3. Compost! 75% of the organic resources Americans throw in a landfill could actually be composted and put back into the Earth.
4. Save seeds each year, and plant them the following season.
5. Reduce turf grass to encourage more species and a diversity of Nature to become part of your garden.
6. Recycle or compost lawn clippings; do not let them contribute to waste in landfills.

# Living with Enagic® Water

You already know that Kangen Water® is an excellent choice for clean, alkaline drinking water. But Kangen Water® is only one piece of a much larger picture. Enagic® water ionizer machines can continuously generate 5 types of healthy, versatile water, each with a very special purpose!

## 1. Strong Kangen Water® - pH 11.0

Strong Kangen Water is not for drinking, but it makes a powerful cleaner and emulsifier! This strong alkaline water can eliminate pesticides and dirt from fresh produce, remove tough stains from clothes (even oil and coffee!), and clean every surface in your home.

## 2. Kangen Water® - pH 8.5 - 9.5

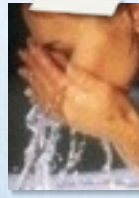

Kangen Water® is slightly alkaline, and makes a healthy choice for cooking and drinking. You can use it to brew your favorite tea, draw out the flavor and aromas in soups and stews, water your plants, and clean all your produce.

## 3. Neutral Water - pH 7.0

Neutral Water is free of chlorine, rust, and cloudiness. This water is a delicious drinking water that can be taken with medicine, as it is not as fast absorbing as Kangen Water®. Baby food may also be prepared with Neutral Water.

## 4. Acidic Water - pH 4.0 - 6.0

Acidic Water is not for drinking, but it is a marvelous choice for gentle toning and beauty care, thanks to its astringent effects. This water is also referred to as Beauty Water, as it can tone and firm your skin, condition your hair, and even shine your beloved pet's fur!

## 5. Strong Acidic Water - pH 2.7

Strong Acidic Water has excellent disinfectant power! It can kill bacteria on cutting boards, kitchen sinks and counters, door knobs, and completely disinfect your bathroom! You can also rinse your clean dishes in Strong Acidic Water to sterilize them.

*You can always discover new ways to use this one amazing product.*

*There is no end to the innovative uses of the healthy Enagic® Waters!*

# Introducing the Forward Thinking Enagic® Water Ionizing Machines!

Every high-quality Enagic® machine is put together by hand with extreme and meticulous care. The integrity of Enagic® and their attention to detail have made them the top producers in the industry.

Our Most Popular Enagic® Machines:

## Leveluk K8

### Most Powerful Anti-Oxidizer for the Home

The K8 is without question the best machine for home use! You get 8 powerful solid plates providing all 5 types of water for maximum home versatility and health benefits for your entire family. Generates all 5 types of Enagic® water.

## Leveluk SD<sup>501</sup>

### The Ultimate Home Use Model

The slick and easy-to-use design of the SD501 makes this machine perfect for everyday use for you and your family.

## Leveluk SD<sup>501</sup> PLATINUM

### The SD501 Under the Counter Unit

There's no reason to sacrifice valuable counter space with the SD501-U! Get the quality and power of the SD501 in a compact size that fits snugly and conveniently under your kitchen counter.

## Leveluk Super<sup>501</sup>

### Large Family Unit

The SUPER 501 is designed for an extended family, as the production rate is much faster than any other machine. It can also be the perfect solution for nursing homes, salons, spas, and agricultural colleges.

## Leveluk DXII

優質水·健康性水濾純水系統

### Good Power at a Great Value

The DXII is the perfect balance between budget and power. While not quite as robust as the SD501 models, it still carries the same fully automatic features.

## Leveluk JrII

優質水·健康性水濾純水系統

### The Energy Saver

The JRII has three solid electrode plates which reduces the energy consumption. This is a great solution for singles or couples who won't be consuming as much water.

## Leveluk R

優質水·健康性水濾純水系統

### The Starter Model

The Leveluk-R is one of Enagic®'s "starter" models because it is affordable for families on almost any budget.

## ANESPA

### Your Home Spa System

The ANESPA ensures a clean, healthy bath or shower. The carefully selected therapeutic ingredients help make your hair and skin healthy and radiant, and provide a relaxing hot spring effect! The ANESPA removes chlorine from your water with its dual cartridge system.

*The water ionizing machines come with a fully-featured LCD control panel with audio guidance, making them easily accessible for any customer. With just the click of a clearly labeled button, you can have instant access to any of the 5 types of healthy water. Your machine also includes a self-cleaning feature, so you don't have to worry about washing every crevice of this high-tech device.*

# The Difference is Enagic®: A Revolutionary Company!

**E**nagic® is a privately owned Japanese company that has provided people with clean alkaline water-making machines for over thirty years.

Since Hironari Ohshiro founded the company in 1974, it has expanded internationally, opening Enagic® USA and offices in Los Angeles, Honolulu, New York and Chicago, Canada, and most recently the Philippines branch!

Enagic® stands behind every product, and backs the hand-made water ionizing machines with solid 3 and 5 year warranties. This is a company dedicated to filling the world with wellness, awareness, and cleaner, greener, healthier solutions.

The Enagic® President and CEO, Hironari Ohshiro, is deeply committed to Kangen Water®, as well as environmental issues.

Ohshiro has developed specific guidelines for the needs of the environment and safety for the next generation. It is the greatest hope at the Enagic® company that all employees and business partners uphold the following guidelines:

1. To secure materials with a low environmental load.
2. To reduce, reuse and recycle waste.
3. To conserve natural resources and achieve energy-saving efficiency in order to prevent global warming.
4. To observe the international laws, regulations, and standards with regard to the environment and safety.
5. To raise awareness of environmental and safety issues, whereby environmental and work-related accidents can be prevented.
6. To seek continuous improvement, setting environmental goals and objectives upon which regular reports are delivered.

The Enagic® Lifestyle is a Green Lifestyle, and we strive every day to create new goals and challenge our company even further, in order to establish the most health-conscious and environmentally responsible company possible!

*That is the Enagic® Difference!*

# Kangen Water® - Change Your Water, Change Your Life®

This is the solution you have been searching for! With Kangen Water®, you can achieve the ultimate marriage of health and wellness: optimal hydration and greener alternatives for your home.

*Thankfully, this ONE product with many purposes can be available TODAY!*

You can have access to healthy Kangen Water® (and the 4 other types of powerful Enagic® waters) in the comforts of your own home. And with so many different styles of Enagic® water ionizing machines available, one of them is the perfect choice for your kitchen and your lifestyle. Our machines come in different sizes to fit each family's consumption needs so you never run out of water. With just a push of a button, you can generate as much drinking water, cleaning water, laundering water, garden water, and bathing water that you and your family could possibly need!

There is no other product like this on the market. Enagic® is the leader in the industry, and the Gold Standard for quality, performance, and overall excellence. In fact, Enagic® has received (and continues to receive) many prestigious certifications over the years.
