TAB Headquarters
Bissell Street in East Hartford.

TAB[®] Computer Systems, Inc. was founded in 1983 by T.J. Benoit. As he embarked on this journey, his main focus was to provide Connecticut's small businesses with quality computer products and unparalleled service. With technology changing and advancing every day, it is more important than ever to seek the help and guidance from TAB[®]. We are here to help small businesses navigate their way through the digital age.

We can provide your business with computer systems, file servers, and networking hardware designed to meet your unique specifications and handle your computer needs. Not only does TAB[®] have the capabilities of providing your company with computer hardware, we also offer network protection, off-site data back-up, and server monitoring through our PatrolDOG[®] suite of services. PatrolDOG[®] ensures that your network is protected at the perimeter and your data is automatically backed up.

T.J.'s motto remains the same after 28 years, "It's all about the client". We have a dedicated team of Microsoft certified system engineers to provide our customers with superior in-house and on-site support. We also offer emergency after hours support.

In conjunction with the great products and services we offer our customers, we also host "Computer Talk with TAB", a weekly radio talk show on WTIC News/Talk 1080. This is a great way for us to reach out to the community and provide free answers to their most puzzling computer and technology questions.

To learn more about how we can help and service your business, contact Erik Semmel, Vice President, TAB[®] Computer Systems, (860) 289-8850 ext. 721, Toll Free (888) 822-4435 or email sales@tabinc.com.
